

RADIATOR POWER (50/50)

Antifreeze and Summer Coolant

Radiator Power (50/50) is a superior quality; ethylene glycol based product, containing an effective anti-corrosion and stabiliser system giving all year protection to engine cooling systems. Radiator Power minimises corrosion, prevents freezing and raises the boiling point.

Applications

- Specially formulated to protect car, truck and bus engines of both ferrous and aluminium construction against corrosion and frost damage.
- Also suitable for use in industrial internal combustion engines where an antifreeze/coolant is required to provide protection against freezing, boil over and corrosion

Performance Features

- Provides enhanced protection to ferrous metals and light alloys through use of higher levels of corrosion inhibitors.
- Longer shelf and service life, and enhanced stability towards hard water because of superior stabilisation of the inhibitor.
- Excellent heat transfer properties and superior anti-foam characteristics.
- Dyed green for identification in mixtures.

Dosage

For optimum year round protection against freezing, boiling and corrosion, Radiator Power (50/50) should be used without further dilution.

Health and Safety

Harmful if swallowed. Keep out of reach of children. If swallowed, seek medical advice immediately. Avoid contact with skin.

Pack Size

- 210 litres

Typical Characteristics

Colour (Visual)	Green
Density @ 20°C kg/l (ASTM D1298)	1.0571
Freezing Point °C (ASTM D 1177)	-36
PH (ASTM D1287)	8.2
